CAREER OBJECTIVE

Computer Science graduate with hands-on experience in Java, Spring Boot, REST APIs, Microservices, MySQL, Hibernate, and Spring Data JPA through academic projects. Strong understanding of Core Java, OOP, database integration, API development, testing, and software development practices. Interested in full-stack development and eager to strengthen Angular and TypeScript skills while contributing to scalable enterprise applications in a collaborative engineering environment.

TECHNICAL SKILLS

Programming Languages: Java, SQL, JavaScript

Core Java Concepts: OOP, Collections Framework, Exception Handling, Multithreading Basics, JDBC

Backend Development: Spring Boot, Spring MVC, Spring Security, REST APIs, Microservices Basics

Database: MySQL, SQL, Relational Database Concepts, CRUD Operations, Spring Data JPA, Hibernate ORM

Core Concepts: Data Structures & Algorithms, DBMS, Operating Systems Basics, Computer Networks Basics, SDLC, Problem Solving

Web Technologies: HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS, Responsive Web Design

Testing & QA: JUnit, Mockito, Unit Testing, API Testing, Debugging

Tools & Platforms: Git, GitHub, Maven, Eclipse, VS Code, Postman

Office Productivity Tools: MS Excel, MS Word, PowerPoint, Outlook

Methodologies: Agile Fundamentals, Modular Architecture

PROJECTS

Loan Application Management System – Spring Boot Microservices

- Developed a microservices-based loan management platform using Spring Boot and Spring Cloud components to support scalable service communication.
- Designed and implemented REST APIs for loan processing, application tracking, and lifecycle management using Spring Security.
- Integrated MySQL database using Hibernate and Spring Data JPA to support structured and secure backend data operations.
- Conducted unit testing, API testing, and debugging using JUnit and Mockito to improve application reliability and maintainable code quality.
- Utilized Git and GitHub for version control and collaborative development workflows following modular architecture principles.

Smart City Management System – Spring Boot Web Application

- Developed a Spring Boot web application for citizen service and complaint management using layered architecture principles.
- Implemented authentication and authorization features while designing REST APIs for service tracking and complaint workflows.
- Integrated MySQL database using Hibernate ORM and Spring Data JPA for structured relational database management.
- Utilized HTML, CSS, and JavaScript concepts to support responsive and user-friendly web functionalities.

EDUCATION

B.Tech – Computer Science & Engineering, KL University, Guntur	2021 – 2025
CGPA: 8.34/10	
Intermediate MPC – SASI Junior College	2019 – 2021
CGPA: 9.5/10	
AP SSC – SASI Educational Institutes	2018 – 2019
CGPA: 9.5/10	

ADDITIONAL STRENGTHS

- Analytical Thinking
- Problem Solving
- Attention to Detail
- Team Collaboration
- Communication Skills
- Quick Learning & Technical Adaptability
